

SPSS Statistics 19.0 Fix Pack 2

Abstract

This Fix Pack will upgrade your SPSS Statistics 19.0 (19.0.0.0) or 19.0 FP1 (19.0.0.1) installation to SPSS Statistics 19.0 FP2 (19.0.0.2).

Download Description

This Fix Pack provides important product corrections for SPSS Statistics 19.0 and 19.0 FP1. It has gone through a targeted regression test suite aimed at validating the roll-up of escalated defect resolutions that have gone into the build kits.

Issues corrected: [Fix List](#)

NOTE: In the transition from SPSS to IBM versioning nomenclature, an additional number was added. For example, the original Statistics 19 release would have been "19.0.0" -- it is now "19.0.0.0". Thus, under the new numbering scheme, the Statistics "19.0.0.2 Fix Pack" is what would have been known before the transition as the Statistics "19.0.2 Patch".

The 19.0.0.2 Fix Pack contains everything included in the 19.0.0.1 Fix Pack, all Interim Fixes (HotFixes) made available since the release of 19.0.0.1 as well as other corrected issues, and can be installed over 19.0 or 19.0 FP1.

In other words, if you are starting with a fresh install of 19.0, there is no need to install 19.0 FP1 before installing 19.0 FP2.

Prerequisites

This Fix Pack is language independent but can only be installed over existing client and server installations of IBM SPSS Statistics 19.0.0.0 or 19.0.0.1 (19.0 FP1).
