

# SPSS Statistics 22.0 Fix Pack 2

## Downloadable files

## Abstract

This Fix Pack will upgrade your SPSS Statistics 22.0 (22.0.0.0) installation to SPSS Statistics 22.0 FP2 (22.0.0.2)

## Download Description

This Fix Pack provides important product corrections for SPSS Statistics 22.0.

Issues Corrected and Release Note(s): [Fix List](#)

NOTE: The 22.0.0.2 Fix Pack contains all Interim Fixes made available for 22.0.0.0 as well as other corrected issues, and can be installed over any of the earlier Interim Fixes with no conflict.

## Prerequisites

This Fix Pack is language independent but can only be installed over existing client and server installations of IBM SPSS Statistics 22.0.0.0

## Installation Instructions

### SPSS Statistics - 22.0 FP2 Installation Instructions

#### Installation Windows

1. Log in as a local administrator.
2. Download the Fix Pack to a temporary location on your hard drive.
3. Ensure that no versions of Statistics are running.
4. Run the Statistics 22.0.0.2 Fix Pack executable.

**Note:** If you are installing on a Windows Server 2008, Windows Vista, Windows 7 or Windows 8 operating system, you **must** use "Run as Admin" by first right-clicking on the executable.

5. Allow a reboot.
6. Statistics 22.0.0.2 is ready to run. Use the Help -> About menu to verify that 22.0.0.2 is now the installed version.

#### Guidelines for unattended/pushed installations for Windows-based clients:

NOTE: This FixPack may require the machine be rebooted to complete the installation. Please be aware that "pushing" the installation in unattended, silent mode may therefore force an unexpected machine reboot on a user, and schedule such installations accordingly.

The SPSS Statistics 22.0.0.2 for Windows Fix Pack obeys the same rules documented in the Site and Network License Administrator's Guides regarding "Extracting the Contents of a Downloaded Installer file" and "Pushing an Installation to Windows Computers".

In this case,

1. Download the appropriate installer file to a temporary location on your hard drive.
2. Open a command window as the local Administrator account and change directory to the temporary download location.
3. Extract the "SPSSStatistics22.0.0.2Patch.msi" and locale-specific .mst file into a specified location from the downloaded FixPack installer file, "22.0-IM-S22STATC-<OS>-FP002.exe", using the documented "/b" switch: 22.0-IM-S22STATC-<OS>-FP002.exe /b"c:\Stats22002FixPack" (where <OS> is your operating system)
4. You can then copy the two extracted files to a network share for easier distribution.
5. Install the patch:  
msiexec /i "c:\Stats22002FixPack\SPSS\_Statistics\_22002\_<OS>\_Patch.msi" /qn /L\*V  
"%temp%\SPSSStatistics22002PatchLog.txt" PYTHON\_EXISTS="1"  
TRANSFORMS="c:\Stats22002FixPack\1033.mst"  
(where <OS> is the same operating system specification as in step 3)

### **Installation Mac OSX 10.7(Lion) through Mac OSX 10.10 (Yosemite)**

1. Download and save the Statistics 22.0.0.2 Fix Pack to your local hard drive.
2. Ensure that no versions of Statistics are running.
3. Execute the Statistics 22.0.0.2 Fix Pack installer from the downloaded .dmg file.
4. Statistics 22.0.0.2 is ready to run. Use the About Statistics 22 menu to verify that 22.0.0.2 is the installed version.

### **Guidelines for unattended/pushed installations for Macintosh-based clients:**

IBM SPSS Statistics 22 FixPack 2 for Mac OS X has a silent (push) installer. To install this FixPack on Mac systems, do the following:

1. Open the 22.0-IM-S22STATC-Mac-Silent-FP002.dmg disk image and copy the two files to your desktop (or any writable location).
2. Open a Terminal window and change directories to the location of the patch installer and installer.properties file.
3. Edit the installer.properties file to suit your needs. The USER\_INSTALL\_DIR parameter must be defined. For example, if the current SPSS Statistics 22 install is in the default /Applications/IBM/SPSS/Statistics/22, USER\_INSTALL\_DIR would be:

```
USER_INSTALL_DIR=/Applications/IBM/SPSS/Statistics/22
```

4. Uncomment and modify other parameters as needed.
5. To execute the installer, use the following command:

```
./SPSS_Statistics_Installer_Silent.bin -f installer.properties
```

### **Installation Linux**

1. Download the Fix Pack to a temporary location on your hard drive.
2. Ensure that no versions of Statistics are running.
3. Open a terminal window and execute the 22.0-IM-S22STATC-Linux8664-FP002.bin executable file as the 'root' user.
4. Statistics 22.0.0.2 is ready to run. Use the Help -> About menu to verify that 22.0.0.2 is the installed version.

**Guidelines for unattended/pushed installations for Linux-based clients:**

The SPSS Statistics 22.0.0.2 for Linux Fix Pack obeys the same rules documented in the Site and Network License Administrator's Guides regarding "Running a Silent Installation on Mac and Linux Computers".

Note: Please contact IBM SPSS Technical Support to obtain the appropriate installer.properties file for the Linux platform.
