

SPSS Statistics 23.0 Fix Pack 2

Abstract

This Fix Pack will upgrade your SPSS Statistics 23.0 installation to SPSS Statistics 23.0 FP2 (23.0.0.2)

Installation Mac OS X 10.9 (Mavericks) through Mac OS X 10.10 (Yosemite)

1. Download and save the Statistics 23.0.0.2 Fix Pack to your local hard drive.
2. Ensure that no versions of Statistics are running.
3. Execute the Statistics 23.0.0.2 Fix Pack installer from the downloaded .dmg file.
4. Statistics 23.0.0.2 is ready to run. Use the About Statistics 23 menu to verify that 23.0.0.2 is the installed version.

IBM SPSS Statistics 23 release is supported on Apple Macintosh OS X 10.9 (*Mavericks*) and 10.10. (*Yosemite*) with Intel processor.

Guidelines for unattended/pushed installations for Macintosh-based clients:

IBM SPSS Statistics 23 FixPack 2 for Mac OS X has a silent (push) installer. To install this FixPack on Mac systems, do the following:

1. Open the 23.0-IM-S23STATC-Mac-Silent-FP002.dmg disk image and copy the two files to your desktop (or any writable location).
2. Open a Terminal window and change directories to the location of the patch installer and installer.properties file.
3. Edit the installer.properties file to suit your needs. The USER_INSTALL_DIR parameter must be defined. For example, if the current SPSS Statistics 23 install is in the default /Applications/IBM/SPSS/Statistics/23, USER_INSTALL_DIR would be:
USER_INSTALL_DIR=/Applications/IBM/SPSS/Statistics/23
4. Uncomment and modify other parameters as needed.
5. To execute the installer, use the following command:

```
./SPSS_Statistics_Installer_Silent.bin -f installer.properties
```
